

**Action Items**  
**North Pole Refinery Technical Project Team**  
**December 14, 2010**

1. Mr. Perkins will contact EPA Region 10 Headquarters and inquire about the timeline for the EPA's investigation of the North Pole Refinery. He will relate any information on the timeline of the investigation for the TPT.
2. Ms. Ha will provide representatives of FHR with a copy of the draft of the DHSS final factsheet on the results of the Garden Study by Monday, December 20<sup>th</sup>, 2010.
3. Dr. Barnes will contact pertinent staff members at UAF and the USDA to discuss the possibility of contracting with those institutions to participate in the proposed greenhouse study.
4. Ms. Elston will provide representatives of FHR with the request for queries that DEC would like to have included in the database.
5. Mr. Coggeshall will contact Ms. Farris and Ms. Minnear to discuss various assumptions within the site's fate and transport model.
6. Ms. Page will provide Ms. Farris with an estimate of the timeline of the investigation into the sump and drainage system at the North Pole Refinery.
7. Mr. Coggeshall will provide Mr. Perkins with a copy of the letter sent by FHR to ADEC outlining the reasons for the investigation in the lab area.
8. Ms. Andresen will contact ADEC to determine whether they have files on the depths of certain residential wells located in or around the plume area.
9. Mr. Coggeshall will relay to ADEC the results of the analysis of samples sent to the state lab as part of their proposed resampling program.
10. Mr. Coggeshall will provide Mr. Mendez with a copy of the drill logs and other information needed to demonstrate that the monitoring wells located near the new municipal well have been properly constructed.
11. Representatives of FHR will follow up on the possibility of securing 3<sup>rd</sup> party verification testing for the in-home treatment system.
